People have wants in these days, as well as in the days that have flown. Let your wants be known, whether you want to sell or want to buy. These ads will bring results.

MAINE HILL BILLY

Hello Everybody! It sure looked wonderful this past Sunday to see most everyone showing their colors of respect for their dear Mothers, even if she is still bearing the burdens of life, or if she has passed on to rest and happiness. We hear so much these days about inflation, there is a natural curiosity aroused in all of us as to what inflation is going to do to help matters.

According to the consensus of opinion, inflation will do little to help the present situation. This is based somewhat upon what happened to England in similar circumstances. Prices may increase which means that the person whose income has not been reduced will find the relation between wages and commodities about as before, whereas the person whose wages have been reduced will have a wider differential. Foreign trade, I believe, is the point where we shall expect to gain by any efforts given us by this fellow inflation.

While we may not look for greatly changed conditions as far as our everyday life goes, because of our abandonment of the gold standard, there is every reason to hope that with a less valuable currency, we may again regain our former position in the markets of the world. It sure seems strange that a nation that has defeated a foreign foe is not being defeated by lack of confidence in itself.

What a pity there are no more frontier countries old days, when rows were hard to hoe, in other words, when there was a depression in the homeland, all the enterprising people set sail for some frontier. They either arrived at their proper destination in due time, where they found gold mines, or were shipwrecked on some nice desert island, after which they always wrote books about their thrilling experiences. We had an ancestor who did just that, so we know it is true. Or if a sailing ship was not handy, there was a good old covered wagon and the westward trail.

We do not know just how it was done, but according to the movies, the heroes who followed the trail always became cattle kings in an incredible short time. Of course a few were killed en route or captured by Indians; most of them, however, got through to some oldorado, where, if it happened to be California, beautiful Spanish señoritas were usually waiting to marry the intrepid pioneers, and to share with them the joys of the delightful ranchero of those early days, that life which was lived with so much dignity and charm.

Yes, in those days there seemed to be plenty ways of escape. Now, alas, about as far as we can get is some park bench or general store, where so many sit, waiting and hoping for better days to come. Well, some of the wise ones tell us better days are on the way and with spring really in the air at last, we are not only willing, but anxious to believe those wise ones.

Now folks get this gold standard and inflation out of your minds forever and let's pull-together and take it on the chin. Like real red-blooded men and women. Remember, in a man, as in an automaton, hitting, knocking is an indication of lack of power. So, so long until a future period.

—Just a Maine Hill Billy.
